ReactJS, React Native, Node.JS, Phoenix, Ecto, Rails, ActiveRecord, jQuery, Ajax, Axios, Webpack, Babel, EJS, Express, Storybook, Jest, Cypress, Bootstrap, Materialize, Rebass, Websockets, Expo, TestFlight

Databases & Systems

PostgreSQL, Git, Heroku, AWS Route53

Work Experience

Dooly || Sep 2021 to Now

Software Engineer I

- *Ship features for a React Single Page Application such as tools for creating high-quality sales notes, extracting unstructured data for use in structured systems, and presenting sales data to different stakeholders*
- *Connect and enrich sales data to and from services such as Salesforce, Google, Outlook, Gong, Slack and OpenAI through our Ruby on Rails backend*
- *Extend the Dooly experience to different interfaces with a Chrome Extension and an Electron app*
- *Improve and automate internal processes with tools such as a CLI, Storybook, CircleCI*
- *Work collaboratively across teams, with departments and customers*

Autotelic || May 2020 to Now

Full Stack Developer

- *Architect, build and maintain APIs on Node with Fastify and Web Workers using Cloudflare Workers*
- *Manage the CI/CD of services through pipelines such as CircleCI, Github Actions, Jenkins and Google Cloud Run*
- *Configure and deploy services with tools such as Terraform to platforms such as AWS, Openshift, Google Cloud Platform and Heroku*
- *Build custom sites for ecommerce businesses*
- *Work with clients and product owners to scope solutions, manage project progress, and integrate tools*
- *Maintain Open Source libraries and contribute to existing Open Source projects*

Swerve Labs || Feb 2020 to Mar 2020

Software Developer - Contract

- *Built a React Native prototype application for the purpose of research and user acceptance testing*
- *Integrated a third-party API into the Ruby on Rails Back-End*
- *Deployed to TestFlight and to Heroku on AWS Route53*

Bench Accounting

Nov 2015 to Sep 2019

Application Support Team Lead

- *Created the Team*
- *Developed, improved and automated the systems of providing support for our applications*
- *Advocated to product managers for features and improvements surfaced by users and provide context for departments and integration partners*
- *Set department goals, worked with my team to iterate on those goals, and reported on the efficacy of our department to provide value to the company*
- *Worked with engineers to identify trends in the inflow of application support work and the root causes of issues to reduce the impact of those problems on our users*

Technical Analyst

- *Provided direct and second level support to the users of our applications and websites*

Education

Lighthouse Labs

Oct 2019 to Jan 2020

Full Stack Web Development

Diploma January 2020

Projects

Hexen || Jan 2019

TypeScript, React, Elixir, Phoenix, Websockets, Rebass, PostgreSQL
